## Our Products

### Ball Shape Bentonite Cat Litter

Ball shape bentonite cat litter is made from natural bentonite from Inner Mongolia, China. This region is known for its high-quality, blocky bentonite with a high montmorillonite content. It has excellent chemical and physical properties, ensuring our cat litter products have excellent absorbency and odor control.

## Irregular Shape Bentonite Cat Litter

Irregular shape bentonite cat litter is made of high-quality calcium-based bentonite that has been sodiumized or natural sodium-based bentonite. Compared with ball shape bentonite cat litter, it has higher hardness, less usage, has stronger clumping and water absorption capacity, and has higher deodorization performance. It is closer to the performance of original crushed cat litter and has a higher cost-effectiveness.

## Natural Sodium Bentonite Cat Litter

(Natural Ore Crushing)

Our natural sodium bentonite cat litter is produced from Asia's largest and China's only sodium bentonite mine, located 300 meters underground. It is of excellent quality and comparable to natural sodium bentonite in Wyoming, USA, ensuring the purity of raw materials from the source.

The cat litter has strong water absorption, good clumping, less usage, and extremely lower dust. Using advanced processing technology, the moisture content is precisely controlled at  $\pm 0.1\%$ , and the dust rate is kept below 0.1%. The cat litter particles are uniform in size and carefully screened, making the use experience more comfortable for cats. The montmorillonite content exceeds 60%, and the deodorizing effect is excellent, which can eliminate 99% of odors.

Comparison	Sodium Bentonite Cat Litter	Ball / Irregular Bentonite Cat Litter
Clumping		
<b>Natural sodium bentonite absorbs water faster, clumps into a flat shape, does not stick to the litter box, and requires less use</b>		
Cat litter replacement cycle reference (1 cat)	10-12 weeks	Ball shape: 2-3 weeks Irregular shape: 4-5 weeks
<b>Compared with calcium-based bentonite, natural sodium-based bentonite has a higher montmorillonite content, is harder, has stronger adsorbability, and has basically no odor. You only need to add it as needed every day, and a bag of cat litter with the same weight can be used for a longer time.</b>		
Comfort	Natural particles, no chemical additives, in line with the nature of cats	After a period of use, dust will be generated and odor control will deteriorate.  Cats will feel a burning sensation on their feet when using sodium-treated cat litter
<b>Natural sodium bentonite cat litter is made from crushed natural minerals, is almost dust-free, and does not contain any other chemical additives, making it more comfortable for cats to use.</b>

## Tofu Cat Litter

Tofu cat litter is a popular plant-based cat litter, mainly made of soy fiber and corn starch. It has excellent clumping and deodorizing ability, while being soluble in water and flushable down the toilet, belongs to an environmentally-friendly cat litter.

We understand the importance of cat litter to the safety of cats and their owners, so our tofu cat litter is made with high-quality food-grade ingredients from a trusted supplier. We strictly avoid using inferior materials and ensure that the product has been subjected to multiple dust removal processes, has excellent performance, and does not contain harmful substances such as formaldehyde or aflatoxin. Even if ingested by cats, it is still safe, protecting the health of pets and their families.

## Differences between different prices tofu cat litter

Depending on the formula, the price and quality of tofu cat litter are different, as follows:

### Grade A

The ingredients are pea fiber, corn starch, guar gum, with the best quality and higher price, suitable for Europe, America and other regions.

### Grade B

On the basis of pea fiber and corn starch, natural wood powder is added to reduce the cost, and the water absorption and deodorization are slightly affected. It is suitable for Southeast Asia, Russia and other regions.

### Grade C

Industrial-grade raw materials are used and some impurities are added to increase weight. It may contain formaldehyde and aflatoxin, and its water absorption and agglomeration performance are very poor. The price is very cheap.

※We do not produce this grade of tofu cat litter.

WhatsApp: +86 18242058834

## Raw Materials and Advantages

Comparison	Ours	Others
Soybean Fiber	Listed company product, food grade, high fiber content 	More impurities, less fiber content 
As the basic raw material of tofu cat litter, it determines its performance.		
Corn Starch	Food grade, safe to eat. 	Industrial grade, commonly used in glue, paint, etc., contains aflatoxin 
No aflatoxins, eliminating the risk of poisoning from accidental ingestion by cats.

## Adhesives

Guar gum extracted from plants can be used in food processing.

An industrial glue that makes cat litter clump faster

**Industrial glues are corrosive and pose a risk of poisoning to cats, but food-grade guar gum is very safe.**

## Wood Powder

Crushed wood, natural, no additives.

Use old wood boards, which contain formaldehyde

**Natural wood powder is non-toxic and harmless, but wood powder produced from old wooden boards contains substances such as formaldehyde, which can affect the health of cats and your family.**

## Paper Cat Litter

Paper cat litter is an eco-friendly litter made from recycled paper with sustainability and pet comfort in mind. It is lightweight and biodegradable, with a gentle texture, making it perfect for kittens, senior cats or cats with sensitive claws. Its soft and non-abrasive properties are particularly suitable for cats recovering from surgery, providing a safe and comfortable environment.

Our paper cat litter stands out for its excellent clumping ability, which ensures firm clumps, easy cleaning and reduced waste. It absorbs water quickly to keep the litter box dry and fresh, while the low-dust formula ensures a clean and safe environment for cats (especially sensitive to airborne dust.) and their owners.

## Mixed Cat Litter

Mixed cat litter is a mixture of tofu cat litter and ball shape bentonite cat litter in appropriate proportions, which is economical and provides excellent performance. By mixing these two materials, the product retains the flushable and environmentally friendly qualities of tofu cat litter while enhancing its clumping ability. The recommended mixing ratio of tofu cat litter and bentonite cat litter is 8:2 or 7:3, which achieves the perfect balance between cost-effectiveness and performance without compromising flushability.

Our mixed cat litter has excellent comprehensive performance, not only reducing costs, but also has excellent clumping, low dust and easy cleaning characteristics, making it an ideal choice for users who pursue value without sacrificing quality.

## Crystal Cat Litter

Crystal cat litter, also known as silica cat litter, is a lightweight, highly absorbent cat litter made from silica beads. Its unique structure effectively locks in moisture and odors, keeping the litter box clean and dry for longer.

Unlike other cat litters, crystal cat litter doesn't clump, not require scooping out urine clumps, is durable and low maintenance. This durability, coupled with the need for less frequent replacement, makes it an ideal choice for busy cat owners seeking convenience and cost-effectiveness.

With a high silica content, our crystal cat litter has excellent absorbency and odor control capabilities, its virtually dust-free properties minimize mess and promote better air quality, while its lightweight design makes it easy to handle and transport. With proper care, a bag of cat litter can last for weeks, providing excellent value. In addition, some users choose to reuse after cleaning, with no noticeable performance degradation.

## Cassava Cat Litter

Cassava Cat Litter is an innovative plant-based cat litter made from natural, food-grade tapioca starch and corn starch, ensuring both safety and environmental sustainability. Known for its excellent water absorption and strong clumping ability, it has non-stick properties for quick and easy cleanup.

Produced using advanced manufacturing technology, our Cassava Cat Litter is virtually dust-free, promoting respiratory health for cats and their owners. Its dual deodorizing system is powered by natural plant enzymes to effectively eliminate unpleasant odors, keeping the litter box fresh and pleasant. It's a reliable and effective choice for conscientious cat owners.
